Experience

Co-Founder & Developer | Reglaze Eyewear | January 2024 – Present
I co-founded www.reglazeeyewear.co.uk, a custom-built Shopify store offering lens replacement services. I developed the site independently with no external funding, implementing tailored JavaScript and Python logic to extend Shopify's native functionality. This includes bespoke order flows, dynamic UI features, and automated backend processes that streamline customer experience and internal operations.

Software Developer | Whoosh Media | January 2024 – Present
I'm a frontend JavaScript developer at Whoosh Media, creating dynamic and responsive web solutions. I've designed and built our company website, and worked within a team to develop interactive mapping tools and accessible journey planners. Currently, I'm diving deeper into 3D technologies, exploring Three.js, Blender, WebGL, and other cutting-edge integrations.

Front End Developer | Self Employed | March 2023 – January 2024
I stepped away from my role in optics and during this time, I committed myself to learning full stack coding. Working independently on various projects for different companies.

Lab Manager | Cubitts | London | September 2021 – March 2023
Orchestrated the seamless integration of cutting-edge MEI and Innovations software systems, ensuring optimal operational efficiency.
Applied a data-driven approach to track and exceed key performance indicators, meticulously maintaining machinery, and overseeing software installations with precision and accuracy.

Optical Store Manager | Cubitts | London | October 2018 – September 2021
Exercised sound judgment in driving KPIs, nurturing team development, managing staff rota and payroll, implementing incentivisation programmes, and executing high-level store strategies.

Retail Operations Manager | KITE Eyewear | London | April 2015 – October 2018
In-Store Trainer / Lab Supervisor / Store Manager | Specsavers | September 2012 – April 2015
Lab Supervisor, Optical Assistant | Vision Express | Winchester, Andover | 2008 – 2012

Education

Full Stack Software Development | March 2023 - March 2024| Code Institute | Dublin, Ireland (Remote)
BA(Hons) Contemporary Performance | 2010 -2013 | University of Winchester

Other interests
I'm a dedicated rugby player, passionate musician, avid video gamer, and proud father of two.
